planting 10 seedlings (at the rate of Rs. 300 for every seedling to be planted) for every tree to be felled is received (This rate shall be valid up to the year 2019-20), and,

(d) Where the tree/trees are of the species Rosewood or Sandalwood, get the tree/trees departmentally extracted within the end of 30 days from the day on which the cost of planting 10 seedlings (at the rate of Rs. 300 for every seedling to be planted) for every tree to be felled is received (This rate shall be valid up to 2019-20).

2. After the felling permissions (where needed) have been given, and the cost of planting 10 seedlings for every tree intended to be felled has been collected, the cost of raising roadside plantation for the length of the road laid/widened should be collected by the jurisdictional Deputy Conservator of Forests from the user agency at the rate of Rs. 3.00 Lakhs per Kilometre (This rate shall be valid up to the year 2019-20) of the length of road being laid/widened. For considering the offer, the user department should be allowed a time of not less than 21, but no more than 30 calendar days, from the date of the offer to communicate to the forest department their acceptance or denial. Failure to communicate within 30 calendar days from the date of the offer would imply that the offer has been declined.

In the event of the user department declining this offer or not communicating anything within 30 calendar days from the date of the offer made in writing,the trees should be disposed of by sale by e-tender-cum-auction by competent authority of the Forest Department as provided in **Appendix XVIII B** of Rule 64 Karnataka Forest Code, 1976, if the upset price is more than Rs. 3 lakhs, and by manual tender-cum-auction when the upset price is less than Rs. 3 Lakhs.

In the event of the auction being unproductive, or when the Minimum Reserve Price is not received, the forest department should extract the trees

4. The value of the tree too should be estimated in the enumeration list using the seigniorage rates for timber (species wise) and firewood that are notified by the Principal Chief Conservator of Forests (Head of Forest Force) from time to time.

5. The user department should send hard and soft copies of the enumeration list of each month, on or before the last working day of the month, to the jurisdictional Deputy Conservator of Forests along with the date by which it will be imperative to have the trees removed. However, the date by which trees are imperative to be removed not be less than 45 days per 50 trees in the enumeration list, from the date on which the enumeration list is being submitted. A. PREPARING ENUMERATION LIST OF TREES TO BE FELLED AND ITS VALUATION (TO BE DONE BY USER DEPARTMENT):

1. The user department (NHAI/PWD etc.) should prepare the enumeration list in **Proforma-A** enclosed. In it, the user department should record as accurate a location of the trees to be felled, as possible. Different enumeration lists should be prepared for each kilometre of the road where felling is to take place. Trees along the left of the proposed road/widening of road will, after the tree number as well as the species of the tree noted in the enumeration list, carry the suffix (L). Trees on the right of the proposed/widening will, after the tree number as well as the species of the tree noted in the enumeration list, should carry the suffix (R).

2. Each tree intended to be felled should be recorded in the enumeration list after, (a) identifying the species of the tree, (b) assigning to each tree an unique but continuous number for the project as a whole [A road going from X to Y having N trees will have the numbers 1 to N], (c) marking the tree in white / yellow paint all along the perimeter of the tree at a height of 137 cms (called breast height of tree in forest mensuration), (d) painting the unique number of the tree in red paint at the breast height white / yellow band on the face nearest to the road, such that each digit of the number is not less than 1 cm in thickness and is contained in a square of size of no less than 20 cms x 20 cms, (e)measuring by a flexible inelastic tape the girth of the tree in centimetres at breast height (length of white/yellow ring detailed before), and, (f) estimating the height (in meters) of the tree up to the leading tip i.e. the part of tree that is seen at maximum height above ground.

3. The enumeration list should have estimates of volumes of healthy, undamaged and sound trees as follows, namely-

   (a) Timber volume in cubic mts.= $g^2h/800000$, when $g > 80$ cms and 0 otherwise,
   (b) Firewood volume in cubic mts. = $g^2h/200000$, when $g > 80$ cms and $g^2h/160000$ otherwise,

   When g = girth at breast height of tree in cms.

   h = height of tree (up to leading tip) in meters.
